

Moonlight AI Received Public Voting Award for Medtech at Top 100 Switzerland Startups: A Trailblazer in AI in Healthcare

Corroux, 5 September 2023 - Moonlight AI, a frontrunner in computational pathology for cancer diagnosis and monitoring, is elated to announce Public Voting Award for Medtech at the prestigious Top 100 Switzerland Startups event.

This recognition underscores Moonlight AI's pivotal role as an innovator in molecular diagnostics, using AI to lower the barrier to precision medicine. The company's selection highlights the significant strides it has made in the fields of computer vision and deep learning to enable a more responsive treatment paradigm for cancer patients.

As a burgeoning leader in the AI sector, Moonlight AI's proprietary technology harnesses the power of high-resolution imaging to deliver swift and cost-effective molecular insights. Its team of accomplished scientists and engineers are dedicated to pushing the boundaries of what's achievable, leading to breakthroughs in fields such as deep learning, computer vision, and quantum simulations.

"We are honoured to win the public voting in the medtech track at the the Top 100 Switzerland Startups event," said Sezai Taskin, Co-Founder and CEO of Moonlight AI. "This recognition affirms our commitment to driving technological innovation and highlights the potential impact of our research across industries."

The selection serves as a testament to Moonlight AI's dedication and accomplishments, positioning it as an influential player in the Swiss startup ecosystem. It also showcases the company's commitment to drive innovation and contribute to the growth of AI in the region.

About Moonlight AI

Moonlight AI is headquartered in the Canton of Jura and is recognized as a leading innovator in the realm of cancer diagnosis, biomarker monitoring, and AI-powered solutions for haematology and cytology. By leveraging advanced deep learning algorithms and quantum principles, Moonlight AI pioneers inventive solutions to streamline the clinical workflow for informed therapeutic decisions. With a team of world-class scientists and engineers, Moonlight AI is at the forefront of transforming diagnostics and biomarker monitoring in the field of cancer.
